

The Magnaflux Wet Bench

Improves quality control traceability

Advanced touch screen operating interface eliminates time spent on manual inputs and record keeping

Easy to use

Allen-Bradley PLC provides reliable controls and off-the-shelf replacements

Faster part processing

Reduce processing time with operator-enabled automatic Double-Mag Shot

Easy pump maintenance

Provides fast access for easy cleaning and service to minimize service issues

Real-world dependability

Best in-class service delivered by a global network of trained Magnaflux authorized service centers

Operator Safety

Low-voltage output minimizes electrical exposure

Minimizes downtime with an agitator system

Helps prevent blockages and clumping by keeping magnetic particles well suspended
